

Thank you for your interest in our products!

To allow for the setup, and later, efficient serial production of your branding, we want to give you an overview of all necessary information. In the following form, please choose all desired devices for branding. Wherever the print template is the same across “compatible” devices (e.g., UVR16x2 and CAN-MTx2), the initial costs will only be billed once.

Costs

- Surcharge per piece: € 5,00
- Minimum quantity per order and print template: 24 pcs (due to production procedure)
- One-time initial cost per print template: € 100,00

Setting up print data

The basis for the creation of the required print data for our production procedure are the enclosed layout templates. In these templates, the permissible print areas are defined. Please position your branding within the print areas and save your template in the original size, colour scheme **CMYK** and a print resolution of **300 dpi**, as a **pdf file**.

Alternatively, we also accept your logo as a separate file, as long as this is a vector file (.eps, .ai, .pdf, .svg) with colour scheme set to CMYK. In this case, our logo will simply be replaced by yours, while other elements (labeling of inputs/outputs, type designation, fonts, and colours) remain unchanged. Changes to our TA brandings are not applied to existing OEM brandings!

Important note

The actual placement of prints can vary by +/- 1 mm from the delivered template. Please also note that colours may deviate from the original. Information on the device casing's colour (RAL) are found in the print template, as the background of the print can also have an effect on the luminosity of the print colours.

Please note: no graphic design services are included in the initial costs. If files unfit for print (e.g., low resolution) need to be adjusted by us, an additional 40€ excl. VAT per hour will be charged.

Further process

Before the first print of your branding, a sample print will be sent to you for inspection and confirmation as soon as possible (sent physically by mail or a photo of the sample per e-mail).

Production of your branded device will only begin after written confirmation of the print.

Fill out the following form (digitally) and send the saved PDF to mail@ta.co.at
You will receive the required print templates from us.

Important: This is not an order form!
